

FFCA HIGH SCHOOL SCHOLARSHIP PROGRAM

Scholarship: High School Campus Society Excellence in Mathematics Scholarship

Description: This award is provided by the FFCA High School Campus Society to be given to a graduating FFCA High School student, one for each high school campus, who has demonstrated an outstanding understanding of the Mathematics curricular criteria throughout their years in FFCA High School. This person has consistently shown a positive attitude towards learning, and has proved himself or herself capable of applying science based knowledge in and outside of the classroom.

Value: \$1,000.00 (each high school campus)

Eligibility: To be eligible for this award, the applicant must be a graduating grade twelve student with a satisfactory standing in all subjects (C grades or better) who consistently demonstrates the positive behaviours and habits in line with the core character virtues at FFCA and who plans on attending a relevant post-secondary program. Recipient should have an academic average of over 80% in math courses and have completed, or be in the process of completing Mathematics 30.

Time Limit: This award must be used within two years following the end of the student's grade twelve year. The award will be paid directly to the recipient's choice of accredited post-secondary institution upon confirmation of registration.

Criteria: Students may nominate themselves, or be nominated by other students, by parents, or by staff. The nominator (student or other person) must submit **a completed application form** along with **a statement (typed)** of not more than 500 words indicating why the nominee would be an excellent recipient of this scholarship. The statement should include the following:

- The nominee should be planning on entering a mathematics or science-based program at the post-secondary level.
- The nominee's approach to mathematics should be through a critical lens, where curiosity of the question "why" far outweighs the generic process used to find an answer.
- Evidence supporting this interest in mathematics would include extension work, requiring an interest in theorems, proofs, and complex mathematics.
- Dual credit courses between FFCA and the university have been considered and perhaps completed by the nominee would be an asset.

With the application the nominee should provide **two references** (name and contact information). These references could be their teachers, coaches, adult supervisor or mentors from the organizations they work or volunteer at.

Selection Process:

The award winner will be selected by a committee composed of administration, staff, and members of the FFCA High School Campus Society.

Deadline: May 24th, 2022 (Applications will be available online on April 18th, 2022)
